

### Year 10 Camp

This occurs very early in Term 1 (prior to week 5) and is an essential activity which takes place at an outdoor education camp. This activity assists students in building community through the incorporation of well-being strategies and positive collaboration. The students undertake a range of activities supervised by trained outdoor education staff. The cost for the camp includes all meals along with transport to and from the venue. The cost will vary from year to year but an indication of cost would be approximately \$285 for a 3 day/2 night camp. You will receive an invoice and permission note with all pertinent information prior to the camp.

### Inter-School Sport

All Year 10 students are required to participate in Inter-School Sport which runs on five nominated days during Term 2 and 3 at an approximate cost of \$60 (to cover the cost of bus transport to the venues).

### Calculators

All students attending an Academy will be required to purchase a Texas Instruments TI-nspire CXII – non cas Graphing Calculator (IB Approved). These calculators are very hard to source in Australia; the Academy will provide you with contact and purchase details for Abacus Calculators who have successfully supplied the Academies for the past ten years. Students typically commence using the calculator in Term 2 of Year 10; it will be the parent's responsibility to ensure the calculator has been purchased in a timely manner. The Calculator, including a padded case, will be approximately \$215. An order form with costs, delivery and warranty details has been provided in the finance package.

### Bring Your Own Device (BYOD)

It is an expectation that all students have an IT device ready for the first day of school. The BYOD model allows students to bring an IT device to the Academy that best supports their learning needs (within specifications). We can understand and appreciate the uncertainties that may be associated with choosing the best device for your child. Please see the BYOD Guide included in your finance package which outlines the minimum specifications that are required as well as examples of the majority of the popular brands that meet these specifications.
